Sr Web Developer

Professional Profile

- **7 Years** exp, Self-starter, Results-driven achiever, good communicator and effective **Sr. Software Engineer** with an extensive experience in the fields of Information Technology, especially working with website development and web application projects with PHP, MySQL (**Laravel Framework, Magento, WordPress, MySQL, MongoDB, MariaDB, Codeginitier, Custom PHP**) as CoreTechnology Concentration and also adapting new technologies like Javascript frameworks like **VueJS, AngularJs, ReactJS**.
- I design & develop responsive websites using contemporary technologies to provide the best user experience while satisfying customer needs, also have expanded my view towards projects management based on Agile Methodology.
- Highly flexible and adaptable performer; adept at multi-tasking and thriving in a fast-paced environment while coordinating numerous time-sensitive projects.
- Proven relationship-builder with exceptional interpersonal, communication, and presentation skills.
- Enthusiastic, knowledge-hungry, eager to meet challenges and quickly assimilate newest and latest technologies, skills, concepts, and ideas.
- Extremely liking to work in a fast paced, deadline driven environment, using effective communication and prioritization between multiple tasks.

Professional Experience

- **Freelancer – May-2016 till date**
Currently employed as their **Sr Full Stack/Web Developer**, which is a fancy name for **Tech Lead** and **Lead Architect** of the **Laravel** eCommerce project. This involves planning the future scoping of the platform, working with the various business owners, and the wider **financial** and **stock management** systems within the company.

I hope to continue building my skills, expanding them to take in a wider scope of environments and languages, and to develop my managerial skills so I can effectively manage a large development team with multiple simultaneous projects.
- **Infinity Programming**
Being **Senior Software Engineer**, mainly responsible for project development, successful project-execution, identifying risks and implementing quick defect-rectification techniques, identifying detailed-requirement of the complete project/enhancements, taking care that the latest and most-optimized technical tools are used in the project-development, can quickly learn and implement new techniques. Grooming of my project-managers and developers to the next level in their respective service areas was my other area of responsibilities. Mainly worked on E-Commerce applications with Laravel development and also creating multiple stores with Magento and Wordpress
- **Elan Emerging Technologies**
Worked as **Senior Software Engineer** and gaining experience to work with a large-scale company [**150-300 Employees Company**] in terms of resources helped me a lot understand the

large-scale clients and getting to know their business in more details, all to help the Management Team, clients for providing better product for their business.

■ **365 Techno Solution** [PHP Developer Position]

Starting the career as a trainee for the final semester of my Engineering Degree and joined as Jr. Developer after the completion of my training and was designated as Assistant Team Leader for PHP Department.

Technology Arena

Following are the technologies & tools I thrive in:

PHP and its various frameworks such as:

- Laravel (since v4, and currently working with v5.4)
- CodeIgniter (v2.4 and v3.1)
- Zend (5.x)
- Symfony
- Yii Framework

Content Management Systems / E-commerce solutions such as:

- WordPress
- Magento
- Shopify
- WooCommerce
- BigCommerce
- OpenCart
- Prestashop

Front-end & design technologies such as:

- Adobe Photoshop, Illustrator & CorelDraw
- CSS/CSS3
- Bootstrap & Twitter Bootstrap
- HTML/HTML5

JavaScript (jQuery, AngularJS, NodeJS, VueJS & ReactJS)

Project Management: Scrum methodology, Agile Methodology

API Integration

- Slack API Integration to send and receive messages on specific actions.
- JIRA, Redmine and Upwork API integration for the project budget software for data-exchange between these multiple applications.
- Any Third-Party REST and SOAP API Integration within any business application with standalone architecture.
- Created end-to-end solution for Hotel and Flight Booking System with Amadeus API

Project Domains

- Extensive experience with E-commerce application development for the following business domains
 - Online Cards / Invitation Cards / Stationery Items / Life Planners / Printing Website Development.
 - Fashion-Accessories Sales Business
 - Mobile-Phone and Mobile-Accessories Business
 - Service Provider clients.
 - Online Photo Art and Framed Photo Art Selling Business
- Content Management Systems
- Web-Analytics Tools and Widgets
- Managing business-specific Inventory Manager to support
- Return-Merchandise Management System for the orders booked from multiple websites.
- Order-Processing System while collecting orders from various orders using API structure which is secure and robust architecture.
- SOAP-Based and Restful Web-services and API Development for managing orders and all other information for single company from multiple clients.
- Custom Enterprise Solutions for Employees tracking their attendance, leave management, payroll management, interview process, project budget tracking, and project's financial activities – all clubbed into single package but are independent of each other which allows system to work on their own without interfering the other elements of the system.
