## Summary

Technology professional with diverse proficiencies in geographic science, information systems, PC and Mac operating systems, along with expert level audio, video, and IP camera installation.

## Education

California State University Channel Islands: Camarillo - B.S. Environmental Science and Resource Management

## Work Experience

### **World Viz: Installer / I.T. Support, Santa Barbara, CA 2021-Present**

My position is to install all the necessary visual reality software on computers to run on projectors or VR headsets. Also install the projectors and surround sound systems. Position is only part-time and temporary once the main installer comes back.

### **National Park Service: Environmental Monitoring Technician, San Diego, CA 2018-2019**

This position was an apprenticeship to learn, yet required troubleshooting and technical knowledge. This job helped me become proficient in the installation and calibration of air and water quality monitoring instruments, solar panels, and network cameras. Also maintain the network to ensure accurate and consistent data on long-term monitoring projects.

### **California State University Channel Islands: I.T. Support, Camarillo, CA 2015-2018**

Worked at the front desk for the I.T. help desk. Maintained all school computers, student and teacher personal computers and phones. Maintain computer facilities, install and fix projectors, and network cameras. The job was only available to students.

### **Best Buy: Magnolia Home Theater, Santa Cruz, CA 2012-2015**

This position required to learn and be able to display the highest quality audio and visual solutions to a customer based off their requests and specifications. Also teach customers how to use and get the most functionality out of their devices. Left for college.

### **IN-N-OUT Burger, Newhall, CA 2006-2012**

Learned to provide the best possible customer service and maintain a clean and safe work area. Also ensured customer satisfaction by consistently producing quality food products.
