

SUSIE BUTLER

WEB DEVELOPER | PHOTOGRAPHER | ARTIST

CAREER OBJECTIVE

Diligent professional with 5 years of multidisciplinary engineering experience and 4 years of web development experience aiming to successfully fill the web developer role on your team. Strong technical and artistic background with a passion for front-end development.

EXPERIENCE

OWNER, OPERATOR, AND WEB DEVELOPER

Orca Web Services, LLC / Everett, WA / 2019 - Present

- Expand the web presence of small businesses through the design and development of custom WordPress websites using HTML/CSS, JavaScript, and PHP.
- 100% on-time completion of front-end web development contract work for eLearning cybersecurity awareness courseware clients MediaPRO and KnowBe4.

COURSEWARE WEB DEVELOPER

MediaPRO / Bothell, WA / 2018 - 2019

- Improved client cybersecurity awareness programs in over 21 languages by developing web-based, eLearning courseware using HTML/CSS, JavaScript, and XML. 100% on-time completion of new content and client customization work.

WEB DEVELOPER

TERRA Staffing Group / Everett, WA / 2017 - 2018

- Reduced the amount of time that recruiters spent on administrative tasks by developing features for the company's proprietary internal web applications using HTML/CSS, jQuery/JavaScript, PHP, AJAX, SQL, and Bootstrap.

SYSTEMS ENGINEER

The Boeing Company / Everett, WA / 2015 - 2017

- Enhanced the organization's communications by developing 5 intranet websites using HTML/CSS and JavaScript in accordance with Boeing's intranet style guide.
- Streamlined the Specification Control Drawing (SCD) process to help save engineering time. Built a web application to guide engineers through the process and collect feedback for future improvement and time savings.
- Managed the completion of the team's requirement validation and verification tasks to help keep the 777X airplane program on-schedule.

MANUFACTURING ENGINEER

The Boeing Company / Everett, WA / 2012 - 2015

- Saved the organization engineering time by writing Excel VBA macros to complete repetitive, manual spreadsheet tasks.
- Enabled the successful completion of a flight test program in a contract with NASA by writing the Flight Configuration Control (FC) engineering definition documents detailing the installation of Active Flow Control Rudder parts onto the test aircraft.
- Enabled the continuation of 767-model airplane production by co-leading a project to design and build a large tooling stand for the factory within a tight timeframe.
