

Full Stack Developer

Jamal Rizki

Projects

Music Website - Created a personal music page using Javascript, Bootstrap, JQuery, CSS and HTML.

Photography Website - Created a personal photography website using React.

Web Developer Site - Created a personal web developer website using Javascript, Bootstrap, Svg images and Animations, Css and HTML.

Zest Cocktails - Created a mock Craft Cocktail App using React-Native, Android Studio and Redux.

Nucampsite - Our main Bootcamp Project was creating a fictional campsite application. Firstly we built the site using Bootstrap, the project was then re-built using React with an accompanying React Native application, finally we added the backend using Node, MongoDB and Express and hosted the project on AWS.

WORK EXPERIENCE
