## CAREER PATH

### SENIOR SOFTWARE ENGINEER

Responsival Inc.

March 2014 – OCT 2019

(5 years 8 months)

Worked on quite large and extensive Laravel and Shopify projects. I have worked on a variety of the programming languages and implemented some new techniques to help speed up the development.

### Developer/ Solution Architect

Aiken House

November 2008 – Feb 2014

(5 years 4 months)

We developed an in-depth and resourceful site to deliver the vast amount of information they needed to communicate to their users. By treating each facet of their business equally, we created a solution that spoke to everyone. By implementing SEO (Search engine optimization), the site is highly searchable. Each bullet point on the home page utilizes a tool tip that in return is searchable.

### Engineeer, Software/Business Development

Clickwork Inc.

March 2012 - January 2013

(11 months)

We had the opportunity to develop the Clickwork identity virtually from scratch. For the business model, research was gathered and it was determined that a unique market position could be attained by showing the broad range of services that Clickwork provides. Through this industry focused content and explainer video, traction has increased.
