Software Engineering

Internship at Cascade Bicycle Club (2017)

- ❖ Received technology volunteer of the year award
 - ❖ Worked on Salesforce back end to manipulate data needed to Improve reporting
 - ❖ Research and implemented solutions for coding errors in the Apex code in a sandbox environment, followed by implementing to the operating environment
 - ❖ Used SOQL to get data on doers in order to better assess current funding and improve projected revenue
-

Education

Sanford-Brown College (2015-2017)

- ❖ Obtained a BA in software engineering, focused on C++, Java, c# and web programming.
 - ❖ Included strategies of structured programming and improve team efficiency
 - ❖ Covered basic and intermediate networking using Windows and Linux based servers
 - ❖ Received forty-six-semester credits, coursework includes, the principles of design and focus on servicing a target audience, through online marketing; covering the tools of adobe master collection with emphasis on PhotoShop
-

Military Experience United States Army MOS 15W (2008-2012)

- ❖ Responsible for over \$2,000,000 in UAS (unmanned aerial systems) equipment, with zero loss during over 750 hours of flight operations while in Afghanistan
- ❖ Lead retraining efforts of UAS operators in proper launch and recovery operations, to improve safety requirements, and avoid unnecessary loss of aircraft
- ❖ Cross-trained to work on generators, ground vehicles, electrical systems, and internet connections, in order to reduce staff need of the unit
- ❖ Improved inspection of ground vehicles, which created new preventative measures, lowering the overall cost of maintenance for the unit
- ❖ Set up and maintained are local area network for both military and private use
