

# Bradley Serlis

---

## Full Stack Developer

[BradleySerlis.com](http://BradleySerlis.com) • Redmond, WA 98052 • [github.com/bradserlis](https://github.com/bradserlis) • (925) 354-3744 • [BRADLEY.SERLIS@GMAIL.COM](mailto:BRADLEY.SERLIS@GMAIL.COM)

## Development Experience

### Software Engineer

January 2019 - August 2019

**CoffeeBreak**, Bellevue, WA - Feature development and testing for mobile app encouraging networking of users to other like-minded professionals in their area.

- Created mobile containers, components, and managed state passed between api and main app with React Native, Redux, and Typescript
- Built web-based containers, components, and styles with React and SASS
- Create lambda functions to manipulate data and write to s3 buckets on serverless stack
- Collaborate with designer through Zeppelin mockups to ship new features

Tech Stack: React Native, Redux, Typescript, PostgreSQL, Xcode, Android Studio.

<https://www.coffeebreakapp.com/>

### Software Engineer

August 2018 - January 2019

**JamMate**, Redmond, WA - Feature development and deployment of mobile app used to connect users to other musicians in their area based on instrument and genre preference.

- Dynamically creates proximity-based and real-time nearby users lists
- Connected Facebook auth for login credentials
- Created custom messaging feature between users

Tech Stack: Web (MongoDB, Node, Express and JavaScript) to React Native, Redux, Expo, Firebase.
