I consider myself a responsible autodidact, creative, skilled and proactive person interested in making available for your organization my full professional potential, with initiative and punctuality. I will assume the challenges and goals your organization might set for me with a positive attitude, good interpersonal skills and a willingness to learn. I am accustomed to working under high pressure and have an interest in professional development. I am very experienced in the field of Information Technology and solving problems efficiently to achieve the goals set by my team and the organization as a whole.
