To whom it may concern:

Computers and technology are my passion. I've been building and repairing computers for the last 3 years. I've built 10 PCs by myself and have repaired countless others. There is nothing in this world that brings me greater joy then working on computers. I would love to grow and expand my knowledge to help more people and to truly understand how every component operates to be able to fix every problem for anyone in need. I'm currently studying for my Compia Networking+ certificate and would love to continue growing my portfolio and gain more certifications using the hands-on knowledge I gain from this experience. I would be very grateful if given the opportunity and would not disappoint.
