

MIKAELA Knight

SUMMARY

Throughout my college education, I've learned how to use multiple communication theories, concepts and programs. I have worked well in the leadership positions I have held. I want to share my creativity while helping others find their own. I know I would be an excellent addition to any team.

I have been working in the food-service industry for over 8 years. I am adamant on always showing up early and working as a team while maintaining a positive attitude. This experience has helped me have a full understanding of communication and appealing to a customer's desires.
