Summary

Reliable humble computer enthusiast. Experienced with electronics disassembly/reassembly, troubleshooting, debugging, and programming. Pursuing a career opportunity in the Vancouver area after finishing a degree in Computer Science and an internship in Spokane.

Relevant Experiences

- **Software Engineering Internship** 09/2020 – 06/2020

Chalk Labs

Developed two production single page applications from client specifications while integrating PushGraph, the company's patented data mining approach.

Provided direct customer and client support for the application after production releases, including patch releases and updates.

- **Bachelor of Computer Science** 09/2017 – 04/2020

Eastern Washington University | Cheney, WA

Trained extensively on computer architecture, .NET Framework/Core, Linux.

Sharpened my skills in programming, troubleshooting, debugging, and effective communication with clients and teammates.

- **Columbia West Engineering** 07/2020 – 12/2020 (Seasonal)

Geotechnical Engineering Technician

Performed maintenance, repairs, and troubleshooting on specialized geotechnical tools and computers.

Provided technical services to contractors involved in civil engineering projects.

- **FedEx Express** 07/2016 – 10/2019

Team Leader

Provided direct training and supervision of 20-30 material handlers and technicians.

Trained employees on computers, FedEx mainframe, Word, Excel, and Outlook.
