---

Professional Projects

"Shopping with A Cookbook" | Full Stack Developer | Oakland, CA
- ❖ Used the Spoonacular API with React to enable users to interact and personalize recipe searches.
- ❖ Mapped through API objects to return JSON data to display on a results page.
- ❖ Constructed responsive results page using Bootstrap to show different recipes for an ingredient.
- ❖ Utilized Balsamiq.com to create wireframes to visualize and prototype front-end functionality.

Course Manager | Full Stack Developer | Oakland, CA
- ❖ Used Java and Spring Tool Suite to manage Many-to-Many Relationships between models.
- ❖ Integrated front-end validations with HTML and server-side validations with Bcrpyt for enhanced security.
- ❖ Designed front-end of application with Bootstrap to create a responsive and eye-catching look.
- ❖ Built registration and login pages to allow for multiple users to input courses and instructors.
- ❖ Tested back-end functionality using MySQL Workbench to ensure users and courses were created.

"Tell Me Where To Go" | Full Stack Developer | Oakland, CA
- ❖ Constructed login and registration validations with VS Code.
- ❖ Formulated Models and HTML pages for user-friendly experiences.
- ❖ Used Postman to verify API endpoints to ensure the validity of data.
- ❖ Utilized Bootstrap to design web pages for easier navigation for users.
